Flask App

The screenshot shows a Jupyter Notebook interface in a web browser. The browser address bar shows 'localhost:8888/notebooks/app.ipynb#'. The Jupyter interface includes a top bar with 'Jupyter app' and 'Last Checkpoint: 13 minutes ago (autosaved)'. Below this is a menu bar with 'File', 'Edit', 'View', 'Insert', 'Cell', 'Kernel', 'Widgets', and 'Help'. A toolbar with various icons is also present. The main area displays a code cell with the following Python code:

```
Flask app for heart predictive model

In [ ]: import numpy as np
        from flask import Flask, request, render_template
        import pickle

        app = Flask(__name__)

        #Prediction function
        def HeartDiseasePredictor(predict_list):
            to_predict = np.array(predict_list).reshape(1,13)
            loaded_model = pickle.load(open("heart_disease_model.pkl", "rb"))
            result = loaded_model.predict(to_predict)
            return result[0]

        @app.route('/')
        def home():
            return render_template('index.html')

        @app.route('/predict', methods = ['POST'])
        def predict():
            if request.method == 'POST':
                predict_list = request.form.to_dict()
                predict_list = list(predict_list.values())
                predict_list = list(map(int, predict_list))
                result = HeartDiseasePredictor(predict_list)
                if int(result)==1:
                    prediction = 'This individual has a heart disease.'
                else:
                    prediction = 'This individual does not have heart disease.'
            return render_template("predict.html", prediction = prediction)

        if __name__=="__main__":
            app.run(port=5000)
```

```
Command Prompt - python 1 x
C:\Users\berly>cd OneDrive
C:\Users\berly\OneDrive>cd Desktop
C:\Users\berly\OneDrive\Desktop>cd Heart_disease_model
C:\Users\berly\OneDrive\Desktop\Heart_disease_model>python app.py

Model web form:

Heart Disease Predictor

Age
63

Sex
Male

Chest Pain Type
Myocarditis

Resting blood pressure (in mm Hg on admission to the hospital)
145

Serum Cholesterol in mg/dl
233

Fasting blood sugar > 120 mg/dl
True

Resting electrocardiographic measurement
Normal

Maximum heart rate achieved
150

Exercise induced angina
No

ST depression induced by exercise relative to rest btw: [0.0-10.0]
2

The slope of the peak exercise ST segment
Upsloping

Number of major vessels
0

Blood disorder called thalassemia
Normal

Predict

Output:

This individual does not have heart disease.
